work to be done and return it at the time demanded. Membership in such lasses is merely desirable from having one's name printed or written as telonging in company with other de--irable fashionable women.

This winter the various societies that have been formed for the relief of the sufferers by the war have at 12 med exactly the same ends as did the old-fashioned sewing society in bringing people together and really accomplishing 2 lot of work.

The group of prominent women who meet every Tuesday at Mrs. George McNear's home on Linden street have greatly enjoyed the weekly gathering. They sew for the Belgians, and many a box, carrying much-needed clothing has found its way over the seas provided by the generous care of Mrs. McNear.

Many of the new clubs are organized for nurposes of study, as for instance, the Monday Club across the bay. The members will also enterrain distinguished visitors to our coast, but that will be in the line of education as well. Every man or woman who has succeeded in the world has a message to others, and that is the best kind of education.

Exclusive clubs in the past have been organized for dancing or for orage, but this exposition year may bring a change, and clubs destined to carry a message far down the future may be organized by women well worth while.

And recently the little girl grown up and the lady who chaperoned her so many years ago met at Piedmont—and the meeting was a source of pleasure to both.

The Baroness Urui was most charming and indeed it is a pleasure to listen to the perfect English used by many of the foreign women, a leader among whom is the baroness.
